

About the cells you are receiving:

These cells were engineered for recombination mediated cassette exchange (RMCE) and CRISPR knockout via Cas9 at the *Drosophila* Research and Screening Center-Biomedical Technology Research Resource (DRSC-BTRR) at Harvard Medical School (N. Perrimon, PI).

We welcome your feedback and would be happy to provide cell culture and protocol tips, provide no-cost consultation, and answer questions about use of these cells for applications such as RMCE, single-gene knockout, and/or CRISPR pooled-format screening.

You can reach us with questions or feedback by emailing the director of the DRSC-BTRR, Dr. Stephanie Mohr, at the following email address: stephanie_mohr@hms.harvard.edu

You can learn more about the DRSC-BTRR at this URL: <https://fgr.hms.harvard.edu/drsc-btrr>

You can read more about the cells in this publication:
<https://www.nature.com/articles/s41467-021-27129-3>

Acknowledging the resource:

Important message regarding If your research work with these cells results in a preprint or publication, we ask that you acknowledge both the distributor of the cells, the DGRC at the University of Indiana Bloomington (NIH 2P40OD010949), and the developer of the cells, the DRSC-BTRR at Harvard Medical School (NIH P41 GM132087).
