

Supplementary Figure 10. 3'-cis-NAT-siRNA loci that were expressed in at least 15 cell lines. Shown are expression of those loci in 25 cell lines. AGO2-IP and AGO1-IP are shown in red and yellow, respectively. An additional plot shows mean of the minimum expression of gene pairs (RNA-seq) producing 3'-cis-NAT-siRNAs in at least 15 cell lines versus other gene pairs producing 3'-cis-NAT-siRNAs.
